

Determine the normal force (η), the shear force (v), and the bending moment (μ)

- at A , C , E , and D ; and
- as functions $\eta(x)$, $v(x)$, and $\mu(x)$, where x is the distance from the left end of the beam.

Graph $v(x)$ and $\mu(x)$.

Determine the normal force (η), the shear force (v), and the bending moment (μ)

a. at A, D, C, and E; and

b. as functions $\eta(x)$, $v(x)$, and $\mu(x)$, where x is the distance from the left end of the beam.

Graph $v(x)$ and $\mu(x)$.

Determine the normal force (η), the shear force (v), and the bending moment (μ)

a. at A , C , D , B , and 1 m to the right of C ; and

b. as functions $\eta(x)$, $v(x)$, and $\mu(x)$, where x is the distance from the left end of the beam.

Graph $v(x)$ and $\mu(x)$.
